Republic of Somaliland

Ministry of Water Resources Development Priorities in 2025-2029

**Hon: Abubakar Abdirahman
Good**

The Ministry of Water Resources has outlined seven national priorities to guide the development of the water sector. These priorities focus on strengthening watershed management and rainwater harvesting, expanding groundwater resources and urban water supply, and improving access to safe water in rural communities.

It also emphasizes advancing water governance, sustainable management, and regulatory frameworks, while enhancing institutional capacity. Furthermore, the agenda underscores the importance of building climate resilience and implementing drought mitigation strategies, alongside integrating hygiene and sanitation services within water resources development.
